# OPERATIVE

---

## PROPOSAL

---

The operative half of our quarter has now begun. <sup>01</sup>

Each of you will spend the next four weeks developing an urban design research project that builds upon Atlas ground work.

The survey showed an overwhelming interest in continuing Atlas research: yes! For those who have exhausted their Atlas topic, now is the time to switch directions and select a new topic to focus on.

For Friday, each of you must formalize your project proposal into a three-page document that captures its essence and aim. You will need to:

- define your final project proposal in a 250-word statement
  - *what system / thing / place are you (re)designing?*
  - *define the scope, program, design problem, etc*
- define the specific location of your design project <sup>02</sup>
- identify what parts of your Atlas carry forward <sup>03</sup>
- identify which part(s) of H. Res. 109 you are interrogating <sup>04</sup>
- identify one-or-more precedent design projects

01 \_ Refer to ARCH415\_SYLLABUS.pdf

02 \_ Everyone is required to submit one (1) 5280 x 5280 pixel image (@ 300 dpi) depicting one square mile centered on your chosen location. This will serve as a base for subsequent mapping, drawing, or modelling that you might do.

03 \_ Not all Atlas content will carry forward; consider how your prior research through eidetic images, maps & core samples needs to be modified or integrated moving forward.

On your three-page document, highlight what is important and relevant to your proposal.
