

DEPLETION OF THE PURPLE

JORDYN COOPER | ARCH 415

INTRO

Depletion of the Purple examines the lack of purple collar jobs, income inequality, and the income gap that the United States is facing in 2020 and what it is heading towards if the country stays on the path it is on now. Depletion of the Purple takes a closer look at individual cities and how they have responded to the circumstances of the time, whether they have responded in a way that furthers the problem or have responded in a way to make their city's economy more equal and just.

CASE STUDIES

THESE CITIES POSSESS MORE EQUAL ECONOMIES
BECAUSE OF THEIR BIGGEST INDUSTRIES

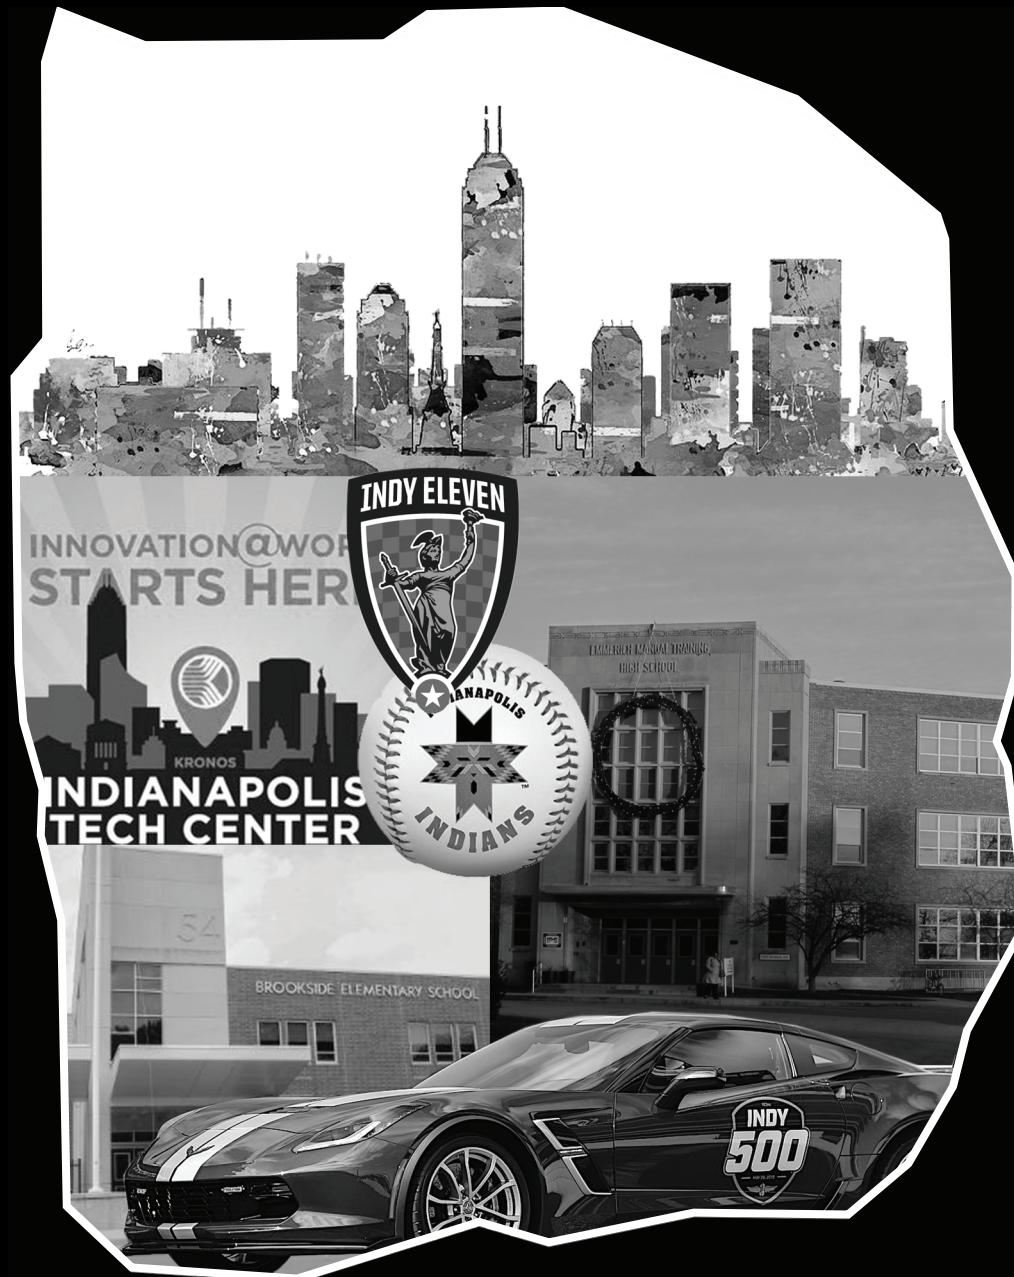

SAN ANTONIO

San Antonio is among the more equal cities in America. The economy is built on defense forces, healthcare, and tourism.

INDIANAPOLIS

With its economy being built on sports, technology, and education, Indianapolis is one of the more equal cities in America.

JACKSONVILLE

Jacksonville's economy is built on defense forces, transportation, and tourism, and has been working to close the income gap.

SAN DIEGO

The economy of San Diego is built on manufacturing and international trade, and is among the more equal economies in America.
